- Mobile App development and deployment, with Ionic3,4 and Angular4,6,7, testing with Jasmine, and automatic deployment with FastLane tool.

- Securing the network infrastructure of the organization.

- Web application development and deployment.

Key Projects Undertaken

Project: XimpleThings Mobile App

Environment: Angular 4 -12, Typescript, SCSS, Ionic Framework, SQLite, Android Studio, Xcode 10, Google Firebase, Sentry, SendBird.

Designation: Architect | Sr. Developer

Description: One stop buying and aftersales app for consumer electronics products in Singapore and Malaysia. It allows consumers to compare the prices from different sellers and to track the warranty of the product.

Project: XimpleThings Retailer App

Environment: Angular 4, Typescript, SCSS, Ionic Framework, SQLite, Android Studio, Xcode 10+, Google Firebase.

Designation: Developer

Description: Retailer partner mobile app. This application provides a platform to local sellers in Singapore and Malaysia to sell electronics goods in wholesale. It also enables the feature of logistic support.

Project: Material Management API (REST) And Web Application

Environment: Laravel, MySQL

Designation: Sr. Developer

Description: Web portal to manage the supply chain of the construction materials and other raw materials like cement, sand, etc. It includes the management for an enterprise including its suppliers, vendors, buyers etc. The rest API is developed to be consumed by the mobile application.

Project: Material Management Mobile App

Environment: Angular 4, Typescript, SCSS, Ionic Framework, SQLite, Android Studio, Xcode 10.

Designation: Sr. Developer

Description: Managing the supply chain in two cases. If the device is Online will directly feed the record otherwise it will keep the application running in the background to sync with the backend in offline mode.

Project: i-Safe Mobile Application

Environment: Angular 4-7, Typescript, SCSS, Ionic Framework, SQLite, Android Studio, Xcode 10.

Designation: Developer

Description: Crime reporting application developed for safety. It enables the user to submit the incident report along with the audio, image, video records. In an emergency the application will manage to call the nearest police station, hospital etc. depending on the incident type.

Project: Label Printing Software

Environment: CodeIgniter, SQLite

Designation: Jr. Developer

Description: Printing the labels for the medical boxes during transit to the wholesaler or retailer. With a predefined access level provided by the organization. With desktop enabled features.

Project: Ximple AWS Infra

Environment: AWS Console

Designation: DevOps

Description: Making auto code deployments, making custom AMI's with Packer to have smooth deployment, writing automated actions to monitor running cron jobs. Securing the servers from outer threads.

Project: Fabrique Love

Environment: AWS Console && Odoo 8 to Odoo 12 code and Data migration

Designation: Team Lead | DevOps

Description: Includes code and data migration from Odoo8 to Odoo12. Along with AWS infra management.

Project: DWS

Environment: OWASP ZAP | OWASP Top 10

Designation: PenTester

Description: Scanning the web application to get the security threads, and finding fix for those leakages.

Project: DWS

Environment: Azure cloud setup and hosting of applications.

Designation: DevOps

Project: Ximple

Environment: App migration from Ionic 4 to Ionic 5. Angular 12 | Node 14 | Ionic CLI 6.x

Designation: Sr. Developer

Internal Projects: System Tracker, PROJOSH, FinanceManagement, HR Management, etc

Employers

Company Name: Invincix Solutions Private Limited

Duration: Since Aug 2017

Designation: Lead Consultant

Academic Qualifications

- MCA from Reva Institute of Technology and Management (VTU) with 68%.
- BCA from Bihar National College with 73%
